CSC 1405 – Advanced Software Engineering

Project Proposal

1. General Information

Project Title	**Student Task Manager**
Team Name	
Course Code	CSC 1405

Team Members

Students	
Shouq Alanazi	(ID: 441003943)
Sarah Albulayhid	(ID: 441003399)
Arjwan Alamri	(ID: 441000970)

2. Project Concept

We are proposing the development of a **Student Task Manager**. It is an optimized, web-based software application designed to assist university students in tracking their academic assignments, structuring deadlines, and enhancing personal productivity. The system is architected around two primary user roles:

- **Students (Standard Users):** Manage their personal academic tasks and visualize progress natively.
- **Administrators (Instructors):** Maintain global system oversight and possess the capability to directly delegate tasks to targeted students over the centralized platform.

3. Agile Product Backlog (User Stories)

Using Scrum methodologies, we have compiled an initial product backlog mapping the core requirements requested in the project rubric layout.

Sprint 1 Focus (Foundation & Student Core)

- High Priority **US-01:** As a student, I want to create an account so that I can have a private workspace.
- High Priority **US-02:** As a student, I want to log into my account securely to access my task list.
- High Priority **US-03:** As a student, I want to add a new task with a title and deadline so that I can track my academic workload.
- High Priority **US-04:** As a student, I want to see a list of my pending and completed tasks to manage my time effectively.
- High Priority **US-05:** As a student, I want to mark a task as "completed" to visualize my progress.

Sprint 2 Focus (Administration & Security Polish)

- Medium Priority **US-06:** As an admin, I want to log into an administrative dashboard to oversee system usage.
- Medium Priority **US-07:** As an admin, I want to see a list of all students registered in the system.
- Medium Priority **US-08:** As an admin, I want to assign a specific task to a specific student so that I can delegate targeted work.
- Medium Priority **US-09:** As a student, I want to see tasks assigned to me by the admin appearing automatically in my personal dashboard.
- Medium Priority **US-10:** As a student, I want to receive real-time notifications when a new task is assigned to me.
- High Priority **US-11:** As a student, I want to see an urgent warning alert if a task deadline is approaching (today or tomorrow).
